Sopra Steria Work History

Client – NTIS (National Traffic Information Service) – From June 2022 to Present
(Frontend Developer)

Project description- NTIS provides traffic information to road users in England. The road network consists of the motorways and key strategic roads. The network is called the Strategic Road Network (SRN). The management of SRN is split into seven regional operation centres. These centres manage the network in their region and feed information to NTIS. The purpose of NTIS is to disseminate information to road users and to manage responses to events that need a strategic response. The information disseminated is traffic metrics and operational intelligence.
